Renewable **ENERGY**

Wagner Industrial Electric (WIE) has extensive electrical construction experience in a variety of well-established industries. WIE is also proactively pursuing projects in the growing renewable energy sector. As our country becomes more dependent on foreign oil, the search for renewable energy is the focus of many research groups. The U. S. Government is mandating a 25% reduction in the import of foreign oil by the year 2012. Ethanol and bio-diesel are front runners in this search for alternative fuel.

WIE recognized the potential of renewable energy early on and has a strong interest in developing these sources. Our expertise, performance history and our strong desire to pursue alternative energy projects, qualified WIE as primary electrical contractor in the first operational ethanol plant in Ohio. We continue to pursue these projects and are excited about the impact these technologies will have on our environment and economy.

WIE supplies labor for your projects utilizing IBEW electricians to assure that your project is completed safely, on time with the quality you expect. Our experienced and qualified team is capable of mobilizing quickly and efficiently. The WIE team includes:

- Project Managers
- Project Coordinators
- Safety Engineers
- Project Administrators
- Field Engineers
- Site Labor Superintendents

With WIE's focus of maintaining an environmentally responsible business, we strive to assist our customers in pursuit of renewable energy endeavors nationwide.

If your company thinks GREEN, Wagner Industrial can help you deliver with Safety, Quality, Performance and Value. WIE is the right choice for your project!

- Hydropower
- Geothermal
- Wind
- Solar
- Bio-diesel
- Ethanol
